Dear Dr. Yetley:

This letter is to notify you that we are offering for sale buffered vitamin C tablets as a dietary supplement. It contains the following structure/function statement: Provides antioxidant protection... Vitamin C's antioxidant activity combats the destructive effects of free radicals. Additional roles include supporting white blood cell function, collagen formation and healthy blood vessels. Bioflavonoids work synergistically with ascorbic acid. Top sources include rose hips, cherries, bell peppers and citrus peel. Our label contains the proper disclaimer as well.

Thank you,

Lori Akian  
Technical Nutrition Assistant
